

Mullion Mount for CCI2D43R

Flush and Surface Mullion Mounting Solution for the CCI2D43R Remote Head Camera

The CHMM Mullion Mount allows for low-profile, low-visibility installations for the CCI2D43R remote head camera. The CHMM supports both flush mounting using only the wall plate, and surface mounting by attaching the backbox back or sides. When flush mounted, the CHMM can become a covert surveillance option that is unobtrusive to patrons. When using the CHMM, the cabling for the CCI2D43R is completely hidden reducing the opportunity for tampering. The mount is designed to work on both metal mullions and drywall.

Series Features

- Flush or Surface Back and Side Installation Options
- Suitable for Metal Mullion or Drywall Installations
- Black and Silver Color Options
- Steel Backbox with Aluminum Wall Plate and Polycarbonate Window
