

Network Camera

Installation Manual

Before reading this manual

This is a basic installation manual for use of a camera module and a main unit. Users who are using this product for the first time, as well as users with experience using comparable products, must read this manual carefully before use and heed to the warnings and precautions contained herein while using the product. Safety warnings and precautions contained in this manual are intended to promote proper use of the product and thereby prevent accidents and property damage and must be followed at all times. Once you have read this manual, keep it at an easily accessible location for future reference.

- The manufacturer will not be held responsible for any product damage resulting from the use of unauthorized parts and accessories or from the user's failure to comply with the instructions contained in this manual.
- The information in this document is believed to be accurate as of the date of publication. The manufacturer is not responsible for any problems resulting from the use thereof. The information contained herein is subject to change without notice. Revisions or new editions to this publication may be issued to incorporate such changes.
- It is recommended that first-time users of this network camera and individuals who are not familiar with its use seek technical assistance from their retailer regarding product installation and use.
- If you need to disassemble the product for functionality expansion or repair purposes, you must contact your retailer and seek professional assistance.
- Both retailers and users should be aware that this product has been certified as being electromagnetically compatible for commercial use. If you have sold or purchased this product unintentionally, please replace with a consumer version.

	Caution	Important information concerning a specific function.
	Note	Useful information concerning a specific function.

Safety Precautions

WARNING

RISK OF ELECTRIC SHOCK
DO NOT OPEN

WARNING: TO REDUCE THE RISK OF ELECTRIC SHOCK,
DO NOT REMOVE COVER (OR BACK).
NO USER-SERVICEABLE PARTS INSIDE.
REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

Important Safeguards

1. Read Instructions

All the safety and operating instructions should be read before the appliance is operated.

2. Retain Instructions

The safety and operating instructions should be retained for future reference.

3. Cleaning

Unplug this equipment from the wall outlet before cleaning it. Do not use liquid aerosol cleaners. Use a damp soft cloth for cleaning.

4. Attachments

Never add any attachments and/or equipment without the approval of the manufacturer as such additions may result in the risk of fire, electric shock or other personal injury.

5. Water and/or Moisture

Do not use this equipment near water or in contact with water.

6. Placing and Accessories

Do not place this equipment on an wall or ceiling that is not strong enough to sustain the camera. The equipment may fall, causing serious injury to a child or adult, and serious damage to the equipment. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturer.

This equipment and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the equipment and cart combination to overturn.

Do not place this equipment in an enclosed space. Sufficient ventilation is required to prevent an increase in ambient temperature which can cause malfunction or the risk of fire.

7. Power Sources

This equipment should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power, please consult your equipment dealer or local power company.

You may want to install a UPS (Uninterruptible Power Supply) system for safe operation in order to prevent damage caused by an unexpected power stoppage. Any questions concerning UPS, consult your UPS retailer.

This equipment should be remain readily operable.

8. Power Cord

Operator or installer must remove power and TNT connections before handling the equipment.

9. Lightning

For added protection for this equipment during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the equipment due to lightning and power-line surges. If thunder or lightning is common where the equipment is installed, use a surge protection device.

10. Overloading

Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.

11. Objects and Liquids

Never push objects of any kind through openings of this equipment as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the equipment.

12. Servicing

Do not attempt to service this equipment yourself. Refer all servicing to qualified service personnel.

13. Damage requiring Service

Unplug this equipment from the wall outlet and refer servicing to qualified service personnel under the following conditions:

- A. When the power-supply cord or the plug has been damaged.
- B. If liquid is spilled, or objects have hit the equipment.
- C. If the equipment has been exposed to rain or water.
- D. If the equipment does not operate normally by following the operating instructions, adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the equipment to its normal operation.
- E. If the equipment has been dropped, or the cabinet damaged.
- F. When the equipment exhibits a distinct change in performance — this indicates a need for service.

14. Replacement Parts

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.

15. Safety Check

Upon completion of any service or repairs to this equipment, ask the service technician to perform safety checks to determine that the equipment is in proper operating condition.

16. Field Installation

This installation should be made by a qualified service person and should conform to all local codes.

17. Correct Batteries

Warning: Risk of explosion if battery is replaced by an incorrect type. Replace only with the same or equivalent type.

Dispose of used batteries according to the instructions.

The battery shall not be exposed to excessive heat such as sunshine, fire or the like.

18. Tmra

A manufacturer's maximum recommended ambient temperature (Tmra) for the equipment must be specified so that the customer and installer may determine a suitable maximum operating environment for the equipment.

FCC Compliance Statement

THIS EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS A DIGITAL DEVICE, PURSUANT TO PART 15 OF THE FCC RULES. THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE WHEN THE EQUIPMENT IS OPERATED IN A COMMERCIAL ENVIRONMENT. THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY AND IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTION MANUAL, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS. OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE HARMFUL INTERFERENCE, IN WHICH CASE USERS WILL BE REQUIRED TO CORRECT THE INTERFERENCE AT THEIR OWN EXPENSE.

WARNING: CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT. THIS CLASS OF DIGITAL APPARATUS MEETS ALL REQUIREMENTS OF THE CANADIAN INTERFERENCE CAUSING EQUIPMENT REGULATIONS.

WEEE (Waste Electrical & Electronic Equipment)

Correct Disposal of This Product

(Applicable in the European Union and other European countries with separate collection systems)

This marking shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.

The information in this manual is believed to be accurate as of the date of publication even though explanation about some functions may not be incorporated. We are not responsible for any problems resulting from the use thereof. The information contained herein is subject to change without notice. Revisions or new editions to this publication may be issued to incorporate such changes.

The software included in this product contains some Open Sources. You may obtain the corresponding source code which we have to distribute according to the license policy. For more information, refer to **System > General** page. This product includes software developed by the University of California, Berkeley and its contributors, and software developed by the OpenSSL Project for use in the OpenSSL Toolkit (<http://www.openssl.org/>). Also, this product includes cryptographic software written by Eric Young (eyay@cryptsoft.com).

Part 1 – Introduction

Product Features

This camera is an IP-based camera module and a main unit that compress and transmit video over ethernet. You can use the INIT program to change network camera settings or the INEX Basic program to manage multiple network cameras. In addition, the embedded web server (WebGuard) lets you remotely view live video or scan recorded video using a web browser. Alternatively, you can use the provided remote access program to manage network cameras and view/record video.

In this manual, the term **Remote System** refers to the computer on which the remote program (INEX Basic or WebGuard) is running.

- Supports DirectNET mode working with a DirectNET™ NVR that allows users to simply set up all required configurations without a PC Supports ONVIF protocol (Core specification version 2.4.2)
- Supports ONVIF protocol (Core specification version 2.4.0)
- Multi-streaming for high-resolution and high-quality video monitoring and simultaneous recording in real-time as well as flexible configurations for those
- Supports H.265, H.264 video compression and M-JPEG still image compression algorithms
- Supports 4-stage video compression rate and multiple compression resolutions
- Bidirectional audio communication support for remote audio dialog *Audio supported model only*
- Video stream buffering to counter pre-/post-event buffering and network delays for improved network recording reliability
- Remote monitoring via web browser or remote software
- Automatic web casting code (HTML) generation
- Up to 10 simultaneous remote connections

- IP filtering, HTTPS, SSL, IEEE 802.1X, and configurable user authority levels for greater security
- Network bandwidth limitation and MAT features for more efficient use of network bandwidth
- Easy network access via UPnP (Universal Plug and Play) function and embedded mDNS (Multicast DNS) protocol
- BLC, HLC, WDR for improved video quality in high-contrast situations
- Day & Night feature
- Quick and easy firmware upgrade over the network
- Redundant firmware and auto recovery features for improved system stability
- Network-based integrated management of multiple network cameras
- Multiple event detection modes: Alarm-in, motion detection, trip zone, audio detection, and tampering
- Backup storage on a microSD memory card as a safeguard against data loss during network interruptions
- Supports 12 VDC and PoE (Power over Ethernet)

Remote monitoring and recording via multistreaming are available using the INEX Basic program. For more information on using INEX Basic, refer to its **operation manual**.

There is a limit to the number of users allowed to connect remotely via the Internet at the same time.

Accessories

Upon purchasing the product, check inside the box to make sure all the following accessories are included. External appearances and colors of the accessories may vary depending on the model.

		
Camera - 2.4 mm	Camera - 4.3 mm	Main unit
Camera Modules		
		
Rubber Foot (4ea.)		Screws (2ea.)
		
Quick Guide		Camera module connection cable

Overview

 Product color and design may vary depending on the model.

Camera Module

Camera -2.4 mm

Camera-4.3mm

1	Lens
2	Mount Bracket

- **Lens**
Sharp-cone Type or Board Type lens is installed.
- **Mount Bracket**
This bracket can be installed to fix the camera. Use 1/4–20 UNC (20-thread), 2.5mm +/- 0.2mm (ISO standard) or 0.197 (ASA standard) screws to attach the mount.

Main Unit

Front

Back

1	Status LED
2	Factory Reset Switch
3	GND
4	Power
5	Network Port
6	SD Memory Card Slot
7	Video In
8	Special Purpose
9	Alarm I/O
10	Audio I/O

• Status LED

- **Power LED:** Indicates the system's operating status. For more information, refer to the [LED Status Indications](#).
- **Network LED:** Indicates the network connection status. For more information, refer to the [LED Status Indications](#).

• Factory Reset Switch

Restore the camera's default factory settings. For more information, refer to the [Factory Reset](#).

• GND

Ground using the ground screw provided with the camera. Ground the frame ground terminal before use.

• Power

- **DC12V -/+:** Connect the two wires of the power adapter to these ports. Be careful not to cross the + and - wires. Booting will commence once connected to a power supply.

- Please wire within 3m(118") indoors for stable power supply when installing the adapter.
- It is recommended to use only one of the 12V adapter power or PoE power. Using two power sources at the same time may limit some functions of NVR.

• Network Port

Connect a Cat5e cable with an RJ-45 connector to this port. If using a PoE switch, you can supply power to the camera using an ethernet cable. For more information on PoE switch use, refer to the switch manufacturer's operation manual. You can configure, manage, and upgrade this camera and monitor its images from a remote computer over the network. For more information on network connection setup, refer to the [INIT operation manual](#).

• SD Memory Card Slot

Pull on the connection cover and then insert a microSD memory card into the slot. (An SLC (Single Level Cell) or MLC (Multi Level Cell) card by SanDisk or Transcend is recommended)

- Do not remove the SD memory card while the system is in operation. Removing the card while the system is in operation can cause the system to malfunction and/or corrupt data stored on the SD memory card.
- An SD memory card is a consumable product with a finite service life. Prolonged use will damage the card's memory sectors and result in data loss or memory card failure. Test the SD memory card regularly and replace it whenever necessary.

• Video In

Connect the camera cable. Connect a Cat5e cable with an RJ-45 connector to the camera module. The recommended connection length between the camera module and the main unit is up to 30m. The recommended cable connection standard between the camera module and the main unit is TIA / EIA-568-B.

- The product could be damaged if used with the crossover cable.

CONN "A"				CONN "B"			
CONN "A" PIN MAP / T568B				CONN "B" PIN MAP / T568B			
No.	COLOR			No.	COLOR

2	Blue			2	Blue		
3	Green			3	Green		
4	Orange			4	Orange		
5	Blue			5	Blue		
6	Green			6	Green		
7	Orange			7	Orange		
8	Brown			8	Brown		

• Special Purpose

These are terminals for special purposes. Contact the place of purchase for more details.

• Alarm I/O

- **Out:** Turn on or off the external device such as a buzzer or lights. (Mechanism: NO (Normally Open) type) Connect a mechanical or electrical switch to the NO and the COM connector. The electrical spec is 0.3A @ 125VAC and 1A @ 30VDC.

- **In:** Connect an alarm-in device to this port.
(Mechanism: Choose between an NC (Normally Closed) type or an NO (Normally Open) type)
Connect a mechanical or electrical switch to the alarm in port and the GND (ground) connector.
Alarm in range is 0V to 5V. In order to detect alarm input, the signal must be higher than 2.4V from an NC switch or less than 0.3V from an NO switch and must last for longer than 0.5 seconds.
- **Audio I/O** *Audio supported model only*
 - **Out:** Connect an amplifier to this port (line out).
This device does not feature a built-in audio amplifier unit and therefore requires the user to purchase a separate speaker system with a built-in amplifier.
 - **In:** Connect an audio source (line in).

When inserting an audio in/out, hold down the button and push the connector in through the exposed hole. Release the button and then gently pull on the wire to ensure a secure connection. To disconnect the cable, press down on the button again and pull the cable out.

Check your local laws and regulations on making video or audio recordings. The user will be held liable for any violation of the law.

Camera Module Cable

1	Video Out (CVBS, Yellow cable)
2	Video Ground (GND, Black cable)
3	Power In and Video Output (RJ45)
4	8P Connector

- **Video Out (CVBS, Yellow cable)**
If necessary, it can be used as a preview function.
 - **Video Ground (GND, Black cable)**
Used as a video (CVBS) ground.
 - **Power In and Video Output (RJ45)**
Connected to the Video In part on the main unit.
 - **8P Connector**
Connected to the camera module.
- RJ45 connector of the camera module cable should be connected to the main unit.
 - CVBS is available only as a preview function when the camera is being installed.

Factory Reset

Only use the factory reset switch to restore the camera to its factory default settings.

A factory reset will clear all camera settings configured by the user.

- 1 Shut off the power supply, insert a straight pin into the switch hole, and press down on the reset switch.
- 2 Hold the switch down and reconnect the power adapter.
- 3 Once the device turns back on and the power LED (red) starts blinking 3 times, wait 5 seconds and then remove the pin.
- 4 The device will go through the resetting process and reboot. All camera settings will be restored to their factory defaults after the reboot.

It's also possible to do a factory reset by pressing and releasing the reset switch while the camera is turned on or using the INIT program from a remote location. A factory reset will reboot the system. For more information on factory reset, refer to the **INIT operation manual**.

Power Connector

----------------	------------------

I/O Connector

Special Purpose	SP	Special Purpose
	GND	Grounding
Audio	In	Audio In
	GND	Grounding
	OUT	Audio Out
	GND	Grounding
Alarm	COM	Common
	NO	Alarm Out (Normally Open)
	AI1	Alarm In
	GND	Grounding

- ☒ The table below shows the network cable specifications.
<The network cable specifications>

Item	Content	Note
Connector	RJ-45	
Ethernet	10/100 Base	10/100 Mbps
Cable	UTP Category 5e	
Maximum length	100m	
PoE	IEEE 802.3at, Class 4	

- When switching over from 12 VDC to PoE as the power source, the system can be rebooted.
- Organize the power cable so that it will not cause people to trip over or become damaged from chairs, cabinets, desks, and other objects in the vicinity. Do not run the power cable underneath carpet or a rug or plug the cable into a power outlet shared by a number of other devices.

LED Status Indications

LED Status		Description
Power LED	Off	Power not connected
	On	Powered on
Network LED	On	Connected to network

Installation

Product color and design may vary depending on the model.

- Check the wall or ceiling to see if it needs to be reinforced. The camera may fall off if the wall or ceiling is not strong enough to support its weight.
- Install the camera in a shaded area. If the camera is installed in direct sunlight, it may affect adversely.

Inserting a SD Memory Card

- 1 Pull and lift the cover to open.
- 2 Insert a SD memory card into the SD memory card slot with the 'micro SD' print facing upward.
- ☒ Push the SD memory card until it disengages from the slot, and then pull it out.
- 3 Close the cover.

Installation

Install to a front panel

- 1 Disassemble the screws on the left and right side to take apart the bracket.

- 2 Remove a sheet on the double-sided tape on the bracket, and attach the bracket to a wall by matching the hole .

☒ When attaching the bracket, remove dust or oil and moisture from the installation surface and apply sufficient pressure to ensure that the applied face completely makes contact with the installation surface.

- 3 Remove the guide shape from the bracket using a nipper.

- 4 Check the location of the arrow as shown below, and assemble the camera to the bracket so that the arrow is located upwards. Fix the camera using left and right screws and connect cable.

☒ The area with the arrow indicates the top part of the image.

☒ The cable may be disconnected due to its weight. Please make sure to fix the cable tightly on to a certain area in order not to be disconnected.

- 5 Fix the main unit to a wall or ceiling using screws.
- 6 Connect the main unit with the cable of the camera module.
- 7 Connect external devices, the network, and the power adapter.
- 8 Connect the power.

Install to other space

- 1 Disassemble the screws on the left and right side to take apart the camera bracket.

- 2 Fix the bracket to a wall or ceiling using double-sided tape or screws.

When attaching the bracket by double-sided tape, remove dust or oil and moisture from the installation surface and apply sufficient pressure to ensure that the applied face completely makes contact with the installation surface.

- 3 Assemble the camera to the bracket by turning it to a desired direction. Fix the camera using left and right screws and connect cable.

The area with the arrow indicates the top part of the image.

The cable may be disconnected due to its weight. Please make sure to fix the cable tightly on to a certain area in order not to be disconnected.

- 4 Fix the main unit to a wall or ceiling using screws.

- 5 Connect the main unit with the cable of the camera module.
- 6 Connect external devices, the network, and the power adapter.
- 7 Connect the power.

Dimensions

External dimensions may vary depending on the date of production.

Camera -2.4 mm

Camera-4.3mm

Main Unit- Front

Main Unit-Side

Part 2 - Camera Connection

Use the camera by connecting to DirectNET™ NVR or non DirectNET™ NVR, VMS such as iNEX Basic.

With DirectNET™ NVR-based Layout

DirectNET™ NVR makes it easy to use cameras without extra network configurations. Each camera can be controlled via the DirectNET™ NVR setup menu, without any PC. For detailed camera settings, please see the camera setting pages of DirectNET™ NVR manual.

For users using the camera with DirectNET™ NVR connection, do not need to consider contents in the camera operation manual.

With non DirectNET™ NVR-based Layout

Control the camera over the network from software installed on a computer.
Ideal for using the camera over the network from a remote location.

The contents in the camera operation manual are only for users using the camera with non DirectNET™ NVR connection or VMS connection such as INEX Basic.

Part 3 - Appendix

Troubleshooting

Problem	Check
The main unit won't turn on.	<ul style="list-style-type: none">• Check the power cable connection.• Check the power outlet.
PoE switch isn't being recognized.	Check the grounding status of the I/O device connected to the camera and the PoE switch. If they are not grounded, ground them and try again.
I can't see Live videos.	<ul style="list-style-type: none">• Check the camera's power status.• Check the network connection status of the computer and the network camera.
Images are blurry.	<ul style="list-style-type: none">• Make sure the lens is clean. If not, clean it using a soft piece of cloth or a brush.• Make sure the lens is in focus. Adjust the focus during daytime.• If there is too much light coming into the camera or the camera is picking up an overly bright light source, adjust the camera's position/angle accordingly.
Video color appears incorrect.	Check the white balance settings. If using the Auto option, it may take some time for the white balance to be adjusted.
Images are blinking.	If the camera is pointed at the sun or a fluorescent lamp, adjust the camera's angle away.
Lost the admin ID and password and unable to connect to a network camera.	You must perform a factory reset. A factory reset will revert all settings, including network settings, to their factory defaults. After performing a factory reset, make a memo of the admin ID and password as a safety precaution.
Unable to launch WebGuard.	If the WebGuard login screen is not loading, check which version of Microsoft Internet Explorer you are using. WebGuard may not launch properly on versions 8.0 or below.
